Ammann & Whitney provides structural, civil, architectural, mechanical and electrical engineering, as well as construction inspection services for a wide range of projects, including bridges, highways, airports, transit stations, schools and government/military installations. The firm has unique expertise in engineering for long-span suspension bridges, blast resistant/hardened facilities, historic structures and monuments and innovative cable-supported structures.

Founded in 1946, Ammann & Whitney joined the Berger Group in 1994. The firm is headquartered in New York City, with offices in Philadelphia and Pittsburgh, PA; Boston, MA; Washington, D.C.; and Richmond, VA. Ammann & Whitney serves both public and private sector clients and has broad-based staff who offer clients the best of both worlds—the range of capabilities and depth of experience usually found in large corporate practices, as well as the attention to service and quality that characterizes smaller professional organizations.

Ammann & Whitney, 96 Morton Street, New York, New York 10014 USA
